STAINLESS STEEL RELIABILITY IN TIME

MENCARELLI PUMPS

SELF-PRIMING PUMPS

QUAD SERIES

Electric self-priming open impeller pumps for big transfers. Completely made of stainless steel. This series can pump aggressive and not clean liquids.

- Capacities up to 45 m³/h
- Head up to 25 m
- Engines from 4 HP up to 7,5 HP
- Suction up to 5 - 6 m
- Available with explosion-proof engines (ATEX)

PAS SERIES

Electric self-priming pumps completely made of stainless steel for medium and high heads. The pump is equipped with a filter and a by-pass to vary capacity.

- Capacities up to 14 m³/h
- Head up to 60 m
- Engines from 0,3 HP a 6 HP
- Suction up to 5-6 m
- Available with explosion-proof engines (ATEX)

SELF-PRIMING FLEXIBLE IMPELLER PUMPS

G SERIES AND MENC-INOX SERIES

A wide range of flexible impeller pumps with low revolution speed and variable speed, completely made of stainless steel. This pump series is self-priming and allows reverse flow. They are particularly suitable for pumping delicate and viscous liquids and liquids with solids in suspension.

- Capacities up to 54 m³/h
- Head up to 30 m
- Suction up to 6 m
- Engines from 0.4 HP up to 5.5 HP

CENTRIFUGAL PUMPS

LT SERIES

Electric centrifugal sanitary pumps for alimentary liquids, completely made of stainless steel. Specially designed to allow a fast disassembling for pump casing and impeller washing operations.

- Capacities up to 54 m³/h
- Head up to 30 m
- Engines from 0,35 HP up to 7,5 HP

CM SERIES

Electric enbloc centrifugal pumps, completely made of stainless steel with open and closed impeller.

- Capacities up to 72 m³/h
- Head up to 60 m
- Engines from 2 HP up to 10 HP
- Available with explosion-proof engines (ATEX)

EL SERIES

Propeller centrifugal pumps particularly suitable for pumping aggressive and not clean liquids. Completely made of stainless steel.

- Capacities up to 24 m³/h
- Head up to 20 m
- Engines from 0.5 HP up to 6 HP
- Available with explosion-proof engines (ATEX)

H/C SERIES

Electric enbloc centrifugal pumps, completely made of AISI 316 stainless steel with open impeller suitable for pumping not clean liquids and liquids with filaments.

- Capacities up to 84 m³/h
- Head up to 15 m
- Engines from 3 HP up to 7.5 HP at 1400 RPM
- Available with explosion-proof engines (ATEX)

P/L SERIES

Electric centrifugal pumps completely made of stainless steel. This series is suitable for pumping aggressive liquids for medium and high heads.

- Capacities up to 15 m³/h
- Head up to 60 m
- Engines from 0,3 HP up to 6 HP
- Available with explosion-proof engines (ATEX)
