

Dura Workshop Furniture System

– Quality Aspects

MODULARITY

DETAILS

Fully modular system. Units of 60/90/120cm that can be used singly or in multiple combinations.

BENEFITS

Gives a robust and solid structure and creates “double walls” where units are joined together. Easy to move and reconfigure.

WORKTOPS

DETAILS

All units have integrated 2.5mm ABS worktop as standard, with nylon, stainless steel, multiplex and galvanised, as options depending on workshop requirements. Standard worktop material provides excellent resistance and durability for modern vehicle services processes and diagnostic work.

BENEFITS

Cabinets do not need additional worktops placing on top...however the standard ABS top can be replaced with optional worktops in other materials, depending on work requirement and customer wishes.

MATERIAL

DETAILS

1.2mm Zinc coated (not CR4) steel and up to 3.2mm in high stress areas.

BENEFITS

Long lasting and heavy duty for tough workshop environment.

FINISH

DETAILS

Zintec (zinc coated) pretreated with phosphate for additional protection. Final coating with Akzo Nobel architectural grade epoxy. Dura is accredited with Akzo Nobel “Service First Approved Supplier” status.

BENEFITS

Dura cabinets are made to withstand conditions in locations worldwide.

LOCKING SYSTEM

DETAILS

Two point locking system on floor-standing cabinets. Doors are double skinned.

BENEFITS

Additional strength and security.

LOCKING SYSTEM

DETAILS

High quality Lehmann locks
“Made in Germany”.

BENEFITS

Floor-standing and wall cabinets delivered with identical keys. Toolboxes are keyed differently for extra security.

DOORS

DETAILS

All doors are double skin construction .

BENEFITS

Additional strength and security. Extra rigidity – doors do not flex.

DETAILING

DETAILS

All corners folded to leave no exposed edges or welds.

BENEFITS

Clean visual appearance and no health and safety risk due to sharp edges.

DOOR OPERATION

DETAILS

Two point locking system,
high quality German
Stabilus gas struts,
dampened closing.

BENEFITS

Long lasting smooth
operation, soft closing
reduces noise.

TOOL BOXES

DETAILS

High quality locks “Made in Germany”.
Ant-tilt system. Dura design slide system
with high quality stainless steel roller
bearings. Loadings of 75kg for slim and
medium drawers and 200kg for deep
drawers. Two lockable castors.

BENEFITS

Built for long term durability for heavy
workshop use. Anti tilt assures safe
operation. High security of valuable tools.
