

GENTLE OSCILLATION AND POWERFUL COMPACTION.

BW 177 BVO-5 PL: AS GENTLE AS IT IS TOUGH.

BW 177 BVO-5 PL - THE SINGLE DRUM ROLLER.

1 COMPACTION WITH VIBRATION.

- When high amplitude is selected, the single drum roller generates an impressive depth effect and handles the applications of considerably heavier machines
- However, if the subsoil and site conditions require it, a low amplitude can also be applied

2 COMPACTION WITH OSCILLATION.

- With the oscillation function, compaction can also be carried out in particularly sensitive areas, such as directly next to buildings, above pipelines or on superstructures

3 OUTSTANDING GRADEABILITY.

- The double pump technology makes steep slopes of 60% possible, both forwards and backwards, and always with the best traction

4 OPERATION IS CHILD'S PLAY.

- Low amplitude, high amplitude, oscillation
- The roller driver can adjust the compaction performance to a new construction site situation in one easy step
- The rotary switch makes selection straightforward

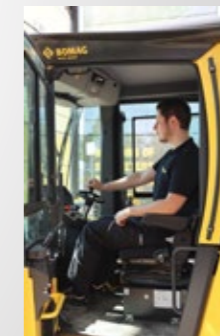

5 EASY SERVICING.

- Maintenance-free articulated joint
- All components positioned for easy access

6 SMART ENGINE TECHNOLOGY.

- The smart ECOMODE speed control saves up to 30% fuel and ensures significantly lower noise levels
- With the optional ECOSTOP, fuel consumption and wear are further reduced

7 ERGONOMIC CABIN.

- Even over prolonged periods, the spacious cabin ensures fatigue-free driving
- The operator always has an excellent overview of the working environment

8 EFFICIENT COMPACTION.

- The optional TERRAMETER and BOMAP eliminate unnecessary passes
- At the same time, the compaction of the entire construction site is measured and documented in real time
